

10th conference Praha 2002

In 2002, the conference traveled to Prague in the Czech Republic where it was hosted by **OK1DFC, OK1AXH, OK1CA, OK1DAI, OK1DAK, OK1DCI, OK1DIG, OK1DST, OK1FM, OK1UWA, OK1VAO and OK2AQK**. The conference was nearly rained out by flooding, which effectively closed down the city right before the conference date, but ultimately turned out a great success. This conference also marked the beginning of serious discussion on the impact of the new digital technology on the sport aspects of our hobby. Both Joe, K1JT and Leif, SM5BZE gave presentations on computer processing techniques that allow the copy of normal CW at signal levels lower than with the ear. VE4MA talked about the first EME on 24 GHz and plans for future 47 GHz EME – now a reality

The banner is a light blue or teal color. In the center is a black rectangular area with a yellow circle containing the text "10th INTERNATIONAL EME CONFERENCE" and a silhouette of a city skyline with a prominent tower, with "PRAHA 2002" written below it. The rest of the banner is covered in handwritten call signs and names in various colors (black, red, blue, green, purple, pink). At the bottom, the main title "10th INTERNATIONAL AMATEUR RADIO MOON-BOUNCE CONFERENCE" is printed in large, bold, black letters, followed by "PRAGUE - CZECH REPUBLIC - HEART OF EUROPE - AUGUST 2002" in smaller black letters.
