

16th conference Lannion 2014

EME2014 was great success. Praise for the conference and its organizers was universal. Bravo to Guy (F2CT), Corine and the rest of the team! The conference was very well done with an abundance of excellent food (breakfast, lunch and dinner plus breaks were included in the conference registration!), an outstanding technical program and plenty of time to socialize. We also appreciated the tours. A highlight of the conference was PAOEHG's reception of 3 cm EME signals with a 50 cm dish. The 6 cm signals from TM16EME were also very impressive.
